Portfolio | Github | LinkedIn

## PROFILE

Third-year Computer Science student with experience building programming projects in various languages and a growing interest in cybersecurity, software, and IT roles.

## EDUCATION

### Carleton University - Ottawa, On

September 2024 - April 2029 (expected)

Bachelor of Computer Science (B.CS) — Cybersecurity stream

- Relevant courses: Applied Cryptography and Authentication, Discrete Structures, Abstract Data Types & Algorithms, Linear Algebra, Calculus

## PROJECTS

### Portfolio Website

- A personal website to display my coding projects and info
- Uses HTML, CSS and JavaScript to create intricate visual effects

### unfollowed.exe Chrome Extension

- Built a Chrome extension that compares Instagram followers and following lists to detect non-followers
- Scraped and processed dynamically loaded DOM content using JavaScript
- Designed a clean UI for in-browser results display
- Does not require the user to login, protecting them from Instagram automation policies

### Opp Detector

- Built a facial recognition system to detect and spray “opps” using OpenCV and a water gun for a hackathon
- Used Python for image processing and GPIO control on Raspberry Pi
- Team of 4; handled back-end logic and system integration

### Phasmophobia Simulator

- Developed a C-based simulation inspired by the game Phasmophobia, modeling hunters and ghosts with independent movement logic
- Implemented dynamic memory allocation to manage game entities and state throughout runtime

## WORK EXPERIENCE

### Camp Counsellor, City of Toronto

May 2025 - Present

- Supervised and engaged groups of children aged 9–12 in daily camp activities, games, and field trips
- Ensured a safe, inclusive, and positive environment by managing group dynamics

### Coding Tutor, Varsity Tutors

October 2024 - January 2025

- Created engaging virtual lessons to teach children coding skills in languages such as Python

### Marketing Assistant, EXP Realty

August 2022 - March 2025

- Designed engaging social media graphics and promotional materials using Adobe Photoshop
- Created short-form video content to support marketing campaigns and increase audience engagement
- Assisted in maintaining brand consistency across digital platforms

## CODING LANGUAGES

C, C++, Java, JavaScript, Python, HTML, CSS

## TOOLS & FRAMEWORKS

Git, VS Code, Node.js, Linux

## CONCEPTS

Object-Oriented Programming, Recursion, Big-O Analysis, Graph Theory, Web Development

## AWARDS & ACHIEVEMENTS

Foundations of Cybersecurity (Coursera, 2025)

Bachelor of Computer Science Entrance Award (Carleton University, 2024)

Entrance Scholarship, (Carleton University, 2024)

Community Services Scholarship Award (Tropicana, 2024)

Ontario Scholar, Sir Oliver Mowat Collegiate Institute, 2024

## COMPETITIONS

uOttahack Participant, 2026  
cuHacking Participant, 2025

SEEK Jr. Participant, 2024

Regional Champions, First Lego League, 2018
